

The Elite Heating Boiler TM

The Elite Heating Boiler from HTP represents the latest advancements in low-mass modulating condensing boiler technology. With best-in-class features throughout the design, the Elite Heating Boiler is the most efficient product in the market at a competitive price. Its aesthetic appeal, versatility, and serviceability make it the right choice for residential and light commercial hydronic space heating.

- **Ultra high efficiency:** up to 98% AFUE, yielding the lowest energy costs of any product in its class
- **5 to 1 turndown ratio:** modulating technology matches fuel consumption to demand to provide high system efficiency even during low load conditions
- **Impressive range:** six models, ranging from 80,000 to 399,000 BTUs, to suit any residential application
- **Installation flexibility:** this streamlined and attractive appliance can be floor mounted or wall hung
- **Convenient design:** a hinged arm provides easy access to components for optimum serviceability
- **Quality construction:** an extremely durable 316L stainless steel heat exchanger boasts excellent heat transfer properties and resists corrosion
- **Excellent venting options:** vents in inexpensive, easy-to-install PVC pipe, up to 200 feet total equivalent length
- **VState-of-the-art control interface:** a two-line 20-character LCD control panel displays easy-to-understand English readouts and service reminders
- **Energy Star rated:** eligible for tax credits and utility company rebates – based on Energy Star ratings (Excludes 399 Model)
