

HTP FACTORY TRAINING SCHEDULE 2011

Elite and MC Boilers ♦ Pioneer and Versa-Hydro ♦ ModCon ♦ Domestic Hot Water

Elite and MC Boilers: this 6 hour course will cover the proper installation and maintenance of HTP's FLOW DEPENDANT modulating, condensing high efficiency gas boilers. This is a technical presentation covering proper boiler piping and circulator sizing, venting, gas piping, controls, commissioning set up, service and maintenance. This course will also introduce products that can optimize the system and boiler efficiency like high performance low temperature baseboard, buffer tanks and control strategies. The hands on segment will allow attendees to train on live fire boilers learning service and maintenance procedures, use Wohler test equipment to properly set gas valve and combustion.

Dates: 5/19/11 or 9/15/11 from 8:00am – 3:00pm

Pioneer and Versa-Hydro: this 6 hour course will cover two of the industries most innovative heat and hot water units. Learn how HTP's award winning NON- FLOW DEPENDANT Pioneer boiler can make you more competitive and profitable in the high efficiency, modulating, condensing boiler installation and replacement market. A boiler designed for direct replacement of a conventional cast iron boiler with the efficiency of condensing technology. No primary / secondary piping and no additional air eliminator is required, minimum maintenance and long life of a proven cupronickel heat exchanger. This is a technical course including piping, venting, gas piping, controls, commissioning set up, service and maintenance.

Part two of this course will cover the versatile space saving combo unit the Versa-Hydro. The Versa-Hydro fits the equivalent of a 135,000 BTU boiler, an indirect water heater, and a buffer tank into one small footprint. This is a technical course including piping, venting, gas piping, controls, commissioning set up, service and maintenance. This course will also introduce products that can optimize the system and boiler efficiency like high performance low temperature baseboard and control strategies.

Dates: 6/23/11 or 10/20/11 8:00am – 3:00pm

ModCon Commercial Boilers: this 5 hour course will cover the proper installation and maintenance of HTP's modulating, condensing high efficiency gas commercial boilers. This is a technical presentation covering proper boiler piping and circulator sizing, venting, gas piping, controls, commissioning set up, service and maintenance. This course will also introduce products that can optimize the system and boiler efficiency like high performance low temperature baseboard, buffer tanks and control strategies. The hands on segment will allow attendees to train on live fire boilers learning service and maintenance procedures, use Wohler test equipment to properly set gas valve and combustion.

Dates: 7/21/11 or 11/17/11 from 8:00am – 3:00pm

Domestic Hot Water: this 4hr course will look at the many different options available to efficiently generate domestic hot water with HTP products from the Volume Water Heater and condensing boilers with SuperStor indirects to the Phoenix condensing commercial water heater and combination units. Learn how different piping and control strategies can affect efficiency and system performance.

Dates: 8/18/11 or 12/15/11 from 8:00am – 3:00pm

REGISTRATION FORM

Please complete this registration form and fax it to 781-986-2028 attn: Judi, or this PDF form can be typed in and emailed to jlapidesgoldberg@emersonswan.com
