

# With Taco You Can Always Pick The Right Pump For The Job

Take the guesswork out of choosing the right pump. Taco gives you clear choices no matter the application!

## The Workhorse **007 Circulator**

### *Millions and Millions Sold!*

- Ideal for multiple hydronic heating applications
- Continuously improved over the years
- Tried and true, reliable technology
- Replaceable cartridge motor for easy service
- Self lubricating, maintenance free design
- No mechanical seal
- Universal flange to flange dimensions
- Models 007-F5 without flow check, or 007-F5-8IFC with flow check

## The Multi Tasker **00R Three Speed Circulator**

### *Radiant Made Easy!*

- Multi speeds are Ideal for fine tuning radiant systems
- Highest performance in it's class
- Highest starting torque in it's class
- Rugged 3-speed switch
- Removable one piece high flow IFC
- Quiet operation
- Direct replacement for Grundfos UPS15-58FC
- Model 00R-MFS-IFC

## The Brain **Variable Speed Delta T Circulator (VDT)**

### *Give your pump a brain!*

- All-In-One Pump And Control
- Eliminates Velocity Noise
- Eliminates The Need For A Pressure By-Pass Valve
- Conserves Energy
- Snap-In PC Board
- Automatically Adjusts To Current Conditions
- Optional Integral Flow Check

Models:  
008-VDTF6  
0012-VDTF4  
0013-VDTF3

The Ultimate  
Zone Valve System  
Circulator!

# Taco Smart Circulator Technology

Available in all "00" series circulator sizes

## Priority Zoning Circulator

- Thermostat Ready
- Built In Transformer
- Built In Relay
- Integral Flow Check
- Low & High Voltage Strips
- Snap-In PC Board
- UL & CSA Listed
- Models 005 through 0014, "ZF" series

## Variable Speed Outdoor Reset

- Controls the hot water supply temperature, so that the heat supplied to the building equals the heat loss of the building
- Built In Transformer
- Built In Relay
- Integral Flow Check
- Models 005 through 0014, "VRF" series

## Variable Speed Temperature Set Point

- Can be set up to deliver a fixed temperature, maintain a specific temperature drop between sensor locations (DT), used as a bypass/shunt pump, or integrated into a fan coil package to vary the speed of the pump based on supply air temperature
- Built In Transformer
- Built In Relay
- Integral Flow Check
- Models 005 through 0014, "VSF" series

## The Service Tech's Best Friend 0010 Three Speed Service Pump

- Replaces most commonly used circulators
- Universal 4-bolt flange
- Heavy duty construction
- Powerful high performance motor

- Makes short work of service calls
- Roomy all-steel capacitor box with dual electric knock-outs
- 3 separate stator windings
- Use with or without IFC
